Engine					
Part	Manufacturer	Part Number	Application	Supplier	Comments
Oil Filter	Crosland	432	MK5A engine only	Motor Factor	Remove rubber top seal from filter and do not use the large "O" ring. This filter fits all MK5A Filter housings
Fan Belts	Many	Various	All engines	Power transmission specialists	22 X 1295 C51 section Ask for a matched pair.

Cooling					
Part	Manufacturer	Part Number	Application	Supplier	Comments
Nothing to report at this stage. NOS available from dealers. Let us have your ideas					
Thermostat	Quinton Hazell	QTH222.	Peugeot 504	Motor Factor	The only one I can find as a close match to the Champ: <b>Champ QTH222</b>  Dia (mm) 58.0 57.0 Temp (C) 73 75  QTH222 is a modern style unit. The critical difference is the depth of the main flange that acts as the seal in the thermostat housing. The Champ unit is 4mm and QTH222 is only 1mm. If I were to use this stat I would cut a "washer" from 3.5mm cork gasket to compensate.

Ignition
